1.1 Index Description

The SGI Data Center VT 8 Index (EUR) (the “**Index**”) aims to provide a hypothetical exposure to the SGI Data Center Index NTR (the “**Underlying Basket Component**”) where such exposure is determined using a daily Volatility Target mechanism.

1.2 Mechanism

The Index is constructed pursuant to a daily Volatility Target process where the deemed exposure of the Index to the Underlying Basket Component (the “**Exposure**”) is based on a formula using the following input parameters:

- (ii) a target volatility of 8% (the “**Target Volatility**”);
- (iii) the historical volatility of the Index itself (the “**Index Historical Volatility**”).

Such that, in most cases, when the short-term historical volatility of the Underlying Basket Component increases, the deemed exposure to the Underlying Basket Component decreases, and vice versa.

So that, in most cases:

- when the short-term historical volatility of the Underlying Basket exceeds 8%, the Exposure will generally be less than 100% (subject to a minimum Exposure of 0%),

Key risks that are specific to the guarantor :

Due to Société Générale's role as guarantor and counterparty to the Issuer's hedging transactions, investors are essentially exposed to Société Générale's credit risk and have no recourse against the Issuer in the event of the Issuer's default.

WHAT ARE THE KEY RISKS THAT ARE SPECIFIC TO THE SECURITIES?

Any sale of the Certificates prior to the scheduled maturity date will result in the loss of the full protection of the amount invested.

Although it is subject to market making agreement, the liquidity of the product may be affected by exceptional circumstances that make it difficult to sell the product or at a price that results in a total or partial loss of the amount invested.

The market value of the Certificates depends on the evolution of market parameters at the time of exit (price level of the Underlying(s), interest rates, volatility and credit spreads) and may therefore result in a risk of total or partial loss on the amount initially invested.

Events unrelated to the Underlying(s) (e.g. change in law, including tax law, force majeure, number of securities in circulation) may lead to early redemption of the Certificates and thus to total or partial loss of the amount invested.

Events affecting the Underlying(s) or hedging transactions may lead to adjustments, de-indexation, substitution of the Underlying(s), or early redemption of the Certificates and consequently to losses on the amount invested, including in the case of capital protection.

If the currency of the investor's main activities is different from that of the product, the investor is exposed to currency risk, especially in the event of exchange controls, which may reduce the amount invested.

The investor is exposed to the risk that the proceeds from the liquidation of the collateral assets will not be sufficient to cover the amount due under the Certificates which is equal to their market value (without taking into account the default of the issuer or guarantor). Such shortfall may be due to lack of diversification or liquidity of the collateral assets, miscalibration, change or absence of haircuts applicable to the valuation of the collateral assets, correlation between the value of the collateral assets and the creditworthiness of the issuer or guarantor, collateralisation at par value or subordination to payment of certain providers.

- The composition of certain indices to which the Certificates are linked, and the methodologies used in relation to these indices, can be determined and selected by Société Générale or one of its related companies. In the choice of these methodologies, it can be expected that Société Générale or the relevant related company of Société Générale will take into account its own objectives and interests and / or those of the Group, and no guarantee can be given that the methodologies chosen will not be less favorable for the interests of investors than the methodologies used by other index sponsors in comparable circumstances.

If the hedging activities of Société Générale or one of its related companies are disrupted in relation to a particular index, Société Générale or the related company concerned may decide to end the calculations of this index, sooner than would another index sponsor in comparable circumstances. This could cause adjustments, de-indexation, substitution of the Underlying(s), or the early redemption of the Certificates.

-Conflicts of interest in connection with proprietary indices

Société Générale acts as sponsor of proprietary indices (SGI Indices). These indices are calculated by an external calculation agent in accordance with rules which describe the methodology for determining the composition and calculation of these proprietary indices (the Rules).

[With regard to proprietary indices composed in a discretionary basis by Société Générale or an affiliate of Société Générale to which Certificates are linked, Société Générale may face a conflict of interest between its obligations as issuer of these Certificates and as a composer of these indices, given that the determination of the composition of these indices may have an impact on the value of the Certificates.]

[With regard to proprietary indices composed by a third party to which the Certificates are linked, Société Générale may face a conflict of interest between its obligations as issuer of these Certificates and as a sponsor of these indices, insofar as it can modify or supplement the Rules, in accordance with the Rules, which may have an impact on the value of the Certificates.]

[With regard to proprietary indices composed by the application of a mathematical formula in a non-discretionary manner by Société Générale or any third party, Société Générale may face a conflict of interest between its obligations as issuer of these Certificates and as a sponsor of these indices, insofar as it may modify, in accordance with the Rules, certain parameters (such as the funding spread) or provide the assessment of certain components, which may have an impact on the value of the Certificates.]

Rischi chiave specifici del garante

Considerando che Société Générale è garante e controparte delle operazioni di copertura dell'Emittente, gli investitori sono essenzialmente esposti al rischio di credito di Société Générale e non hanno ricorso nei confronti dell'Emittente in caso di inadempimento dell'Emittente.

QUALI SONO I RISCHI CHIAVE SPECIFICI DEI TITOLI?

La vendita delle Certificati prima della prevista data di scadenza determinerà la perdita della protezione totale dell'importo investito.

Benché sia oggetto di impegni di market making, la liquidità del prodotto può essere influenzata dal verificarsi di circostanze eccezionali che potrebbero rendere difficile vendere il prodotto o comunque ad un prezzo che produce la perdita totale o parziale dell'importo investito.

Il valore di mercato dei Certificati dipende dall'evoluzione dei parametri di mercato al momento dell'uscita (livello dei prezzi dei Sottostanti, tassi di interesse, volatilità e credit spreads) e può pertanto comportare un rischio di perdita totale o parziale dell'importo inizialmente investito.

Il verificarsi di eventi non legati al Sottostante (quali la modifica di previsioni di legge, inclusa la normativa fiscale, eventi di forza maggiore) possono determinare il rimborso anticipato dei Certificati e quindi la perdita totale o parziale dell'importo investito.

Il verificarsi di eventi relativi al Sottostante ovvero a operazioni di copertura può determinare la necessità di rettifiche, de-indicizzazioni, sostituzione del Sottostante, e di conseguenza a perdite del capitale investito, anche in caso di prodotti a capitale protetto.

Se la valuta di riferimento delle attività principali dell'investitore è diversa da quella del prodotto, l'investitore è esposto al rischio di cambio, in particolare in caso di controlli sul cambio, che potrebbero ridurre l'importo investito.

L'investitore è esposto al rischio che i proventi derivanti dalla liquidazione degli attivi posti a garanzia non siano sufficienti a coprire l'importo dovuto in relazione ai Certificati, importo pari al loro valore di mercato (senza tener conto dell'eventuale default dell'emittente o del garante). Tale insufficienza può derivare da una mancanza di diversificazione o liquidità degli attivi posti a garanzia, da errori di calibrazione, da modifiche o assenza degli haircut applicabili alla valutazione degli attivi a garanzia, dalla correlazione tra il valore degli attivi a garanzia e la solidità creditizia dell'emittente o del garante, dalla collateralizzazione al valore nominale o dalla subordinazione rispetto al pagamento di determinati fornitori.
